14.6. The project Work being requested consists of:

A. SURFACE PREPARATION:

- Cleaning and prepping all Included Surfaces,
- Scraping and sanding all peeling Paint,
- Filling and Sealing (Caulking) all cracks and holes,

B. PROTECTION OF SURFACES: Protecting all surfaces that are not being painted.

C. JOB CONDITIONS: Working according to appropriate conditions.

D. MATERIALS PREPARATION: Preparing Paint Materials as specified.

E. APPLICATION:

- Apply two (2) coats of Paint on select Included Surfaces,
- Apply Paint to **SPECIAL CONSIDERATION** areas as specified.

F. CLEAN-UP: Clean and dispose of chemicals and debris (offsite) related to the painting of the Facility.

A. SURFACE PREPARATION:

a. General Surfaces

- i. Perform preparation and cleaning procedures including Pressure washing of all exterior exposed surfaces to receive paint and coatings: including masonry surfaces, wood, and metal trim, in strict accordance with MFR's instructions.
- ii. Clean surfaces to be painted before applying paint or surface treatments. Surfaces shall be clean, dry, and adequately protected from dampness prior to painting. Surfaces shall be free of any foreign material that may adversely affect adhesion or appearance of applied coating. All vines and other plants attached or touching the surface to be painted should be removed.
- iii. Cleaning must take place away from all newly painted-surfaces so that contaminants from the cleaning process will not fall onto wet, newly-painted surfaces.
- iv. Verify that the surface is clean before painting. Test several areas by wiping with a clean, white rag, dampened with water. If the cloth gets dirty or any mildew is still visible, repeat the cleaning process, rinse, let dry and test again.
- v. Any surface left unpainted longer than thirty days after being pressure washed may require washing again before painting (required if/when weather delays exterior project) Do not paint over dirt, rust scale, grease, moisture, scuffed surfaces, or conditions otherwise detrimental to formation of durable paint film.

- vi. Remove all loose, chipped and peeling paint, paying special attention to metal doors, frames, columns and railings where applicable or other surfaces by sanding, scraping, mechanical or chemical means to prepare the surface and prime prior to painting.
 - vii. Previous coats of paint that appear to be applied over an unsatisfactory substrate should be cleaned or prepared to achieve a sound surface before painting. (e.g. Previous coat of paint applied over a chalky or mildewed surface.) Use different tests to measure the resistance of paints and coating from substrates: cross-cut test, scrape adhesion, pull-off test on each type of surface in many given areas to check for adhesion of the present coating.
 - viii. Blemishes, minor holes, chips etc. should be caulked, patched or filled prior to priming.
 - ix. Protect all foliage, and property within the vicinity not being painted.
- b. Masonry/Cementitious Surfaces:
- i. Rebuild and repair all masonry surfaces where necessary. Patch and caulk all cracks and voids in, masonry, concrete, plaster, metal and wood. Caulking shall also be required at all similar and dissimilar materials - wood to masonry, masonry to metal, masonry to masonry and etc. Also, where needed, metal to metal surfaces.
 - ii. Prepare cementitious surfaces of concrete, concrete block, cement plaster/stucco and cement-based board to be painted by removing all efflorescence, chalk, dust, dirt, grease, oils and by roughing as required to remove glaze.
 - iii. Determine alkalinity and moisture content of surfaces to be painted by performing appropriate tests. If surfaces are found to be sufficiently alkaline to cause blistering and burning of finish paint, correct this condition before application of paint. Do not paint over surfaces where moisture content exceeds that permitted in MFR's printed directions.
 - iv. All chalk, dirt, mud stains, mildew, efflorescence and any other contaminants or stains should be removed by pressure washing and scrubbing utilizing detergents or other chemicals as required to remove the stains or contaminants. Failure to completely clean the surface could result in stains bleeding through the finish coat of paint and/or failure of the finish coat to adhere properly. Also previous coats of paint which were improperly prepared in the past may peel if the surface is not properly prepared.
 - v. After pressure washing, any surface that was chalky, it shall be sealed with one coat of waterproofing sealer.
 - vi. All openings where water could enter should be sealed with Elastomeric type caulk or patching materials or use urethane caulk [approved by MFR, to prevent water or moisture from getting behind the coating. Use only an elastomeric patch or caulk with backing rod on voids. Cracks or joints subject to movement e.g. Stucco, CMU. Follow MFR's instructions for top coating over caulking and patching materials. Mortar or stucco which require repair must be patched with an appropriate repair compound.
 - vii. Before applying the finish materials, patched areas must be blended to match the adjacent surfaces so as not to appear as an obvious patch.
 - viii. Where the old paint exhibits failure over 25% or more, complete removal is required for best results.
- c. Metal Surfaces:
- i. Clean surfaces of oil, grease, dirt, loose mill scale and other foreign substances by solvent or mechanical cleaning, sanding or stripping. Where necessary may need to remove finish to base metal to provide an acceptable smooth finish.

- ii. All loose or peeling paint should be removed by scraping, sanding or wire brush by power or hand tool methods. A cross-cut test, scrape adhesion, pull-off test should be performed on remaining paint to assure that the old layer of paint has proper adhesion to prevent future peeling problems.
 - iii. Clean and add prime coats wherever rusted, damaged or bare. All rough edges where paint has peeled or been scraped must be feathered out so as not to leave any rough, thick or sharp edges.
 - iv. All rust should be removed by sanding, grinding, and wire brushing. Use power or hand tool methods. The paint should be removed on all sides a minimum of two (2) inches from the rusted metal into a clean rust free surface.
- d. Caulking:

Caulking/Sealant shall be compatible with the specific painting products being used and the associated MFR's application procedures and specifications. Caulking shall be gun applied through a nozzle opening so that the full caulk bead is funneled into the joint. Concave immediately after application to insure firm, full contact with inner faces of the joint. Excess material shall be struck off. The joint shall be clean and smooth. Primers and cleaning agents shall be as specified by the MFR.

B. PROTECTION OF SURFACES:

- a. The contractor shall protect his work at all times and shall protect all adjacent areas by suitable covering or other method during progress of the work.
- b. Surfaces not to be painted shall be left completely free of droppings and accidentally applied materials resulting from work under this specification. In general, surfaces not previously painted include pre-finished substrates such as aluminum, chromium, copper, stainless steel, floors, plastics, pre-finished screen enclosure frames and doors. The stated items shall not be painted unless stated otherwise. **Note: Extra care must be taken to protect surfaces from over spray and paint spatter.**
- c. Protect other areas against damage during painting and finishing work. Correct any damages by cleaning, repairing or replacing, and repainting, as directed by the Project Manager.
- d. Provide "Wet Paint" signs and other protective barriers as required to protect newly painted finishes. Remove temporary protective wrappings provided for protection after completion of painting operations.
- e. Extra care must be taken to protect surfaces from over spray and paint spatter. The contractor shall protect his work at all times and shall protect all adjacent areas by suitable covering or other method during progress of the work, this includes neighboring properties. Contractor shall remove all paint spots from other surfaces.

C. JOB CONDITIONS:

Do not paint in rain, fog or mist or when relative humidity exceeds 85% or too damp or wet surfaces, unless otherwise permitted by the MFR's printed instructions. Painting may be continued during inclement weather only if areas and surfaces to be painted are enclosed and heated within temperature limits specified by the MFR during application and drying periods.

D. MATERIALS PREPARATION:

- a. Mix and prepare painting materials in accordance with MFR's directions.
- b. Store materials, not in actual use, in tightly covered containers. Maintain containers used in storage, mixing and application of paint in clean conditions, free of foreign materials and residue.

- c. Stir materials before application to produce a mixture of uniform density, and stir as required during application of materials. Do not stir surface film into material. Remove film and if necessary, strain material before using.

E. APPLICATION:

- a. All painted surfaces shall have minimum of two (2) coats
- b. Apply paint in accordance with MFR’s direction. Use applicators and techniques best suited for the type of material being used. Application may be by brush, roller or spray.
- c. All materials should be applied under adequate illumination, evenly spread and flowed on smoothly to avoid runs, sags, brush marks, air bubbles and excessive roller stipple.
- d. Apply additional coats when undercoats, stains or other conditions show through the final coat of paint, until paint film is of uniform finish, color and appearance. When color, stain, dirt or undercoats show through the final coat of paint, the surface shall be covered by additional coats until the paint film is of uniform finish, color, appearance and coverage, and at no additional cost to the TPMPD.
- e. Paint surfaces behind movable equipment and furniture same as similar exposed surfaces. Paint surfaces behind permanently-fixed equipment.
- f. Paint all surfaces visible through grilles, registers and vents.
- g. Paint top, bottoms and side edges of all doors same as exterior faces (exterior facing)
- h. Paint exterior facing access panels, to match exposed surfaces.
- i. Sand lightly between each succeeding enamel coat. Drying time between coats shall be per container label and data sheet instructions
- j. Thinning shall be done only if necessary for the workability of the material and then only in accordance with label instructions and using only recommended solvents
- k. It is recommended that test areas be applied over all surfaces with specified systems to check for proper adhesion prior to proceeding with painting and entire surface
- l. No coating shall be applied if rain or snow is expected within two (2) - three (3) hours and when the surface and air temperature is below 35 degrees F. or above 100 degrees F. Contractor must adhere to MFR’s directions

m. **SPECIAL CONSIDERATION** areas:

Completion and/or Correction of Work and Remedies Before Final Payment: If the Contractor should neglect to prosecute the work properly and/or fail to perform any provision of this contract, the Owner after seven (7) calendar days' written notice to the Contractor, may, without prejudice to any other remedy Owner may have, make good such deficiencies and deduct the cost thereof from payments then or thereafter due the Contractor.
- 22.3. The Contractor shall promptly remove from the construction site all materials condemned by the Owner as failing to conform to the contract, whether incorporated in the work or not; and the Contractor shall promptly replace and re-execute the work in accordance with the intent of the contract and without expense to the Owner and shall bear the expense of making good all work of other contractors destroyed or damaged by such removal or replacement. If the Contractor does not remove such condemned work and material within the period herein above described, the Owner may remove and store any such material at the expense of the Contractor. If the Contractor does not pay the cost of such removal within ten (10) calendar days from the date the notice to the Contractor of the fact of such removal, the Owner may, upon an additional ten (10) calendar days' written notice, sell such materials at public or private sale, and deduct all costs and expenses incurred, including costs of sale, accounting to the Contractor for the net proceeds remaining, and the Owner may bid at any such sale. The

Contractor shall be liable to the Owner for the amount of any deficiency from any funds otherwise due the Contractor.

- 22.4. The Contractor shall bear the risk of loss or damage for all finished or partially finished work until the Owner finally accepts the entire contract.

23. SUPERINTENDENT AND SUPERVISION

- 23.1. The Contractor shall keep on the construction site during progress of the work a competent superintendent and any necessary assistants, all satisfactory to the Owner. The superintendent shall not be changed except with the consent of the Owner, unless the superintendent proves to be unsatisfactory to the Contractor and ceases to be in Contractor's employ. The superintendent shall represent the Contractor in Contractor's absence and all directions given to the superintendent shall be as binding as though given to the Contractor. Instructions to the Contractor shall be confirmed in writing upon Contractor's request in each case. The Contractor shall give efficient supervision to the work, using Contractor's best skill and attention.

24. SEPARATE CONTRACT - INTERFERENCE WITH OTHER CONTRACTORS

- 24.1. The Owner reserves the right to perform work with its own forces or to let other contracts for work under similar general conditions in connection with this project, of which the work is awarded to one or more contractors under separate contract is a part. The Contractor shall afford the Owner and other contractors' reasonable opportunity for the introduction and storage of their materials and the execution of their respective work and shall properly connect and coordinate Contractor's work with theirs.

25. GENERAL CONTRACTOR RESPONSIBILITIES

- 25.1. Permits, permission under franchises, licenses and bonds of a temporary nature necessary for and during the prosecution of the work, and inspection fees in connection therewith shall be secured and paid for by the Contractor. Where the Owner is required to secure such permits, permission under franchises, licenses and bonds against the Contractor the Owner may offset the costs incurred against the contract price.
- 25.2. The Contractor shall give all notices and comply with all laws, ordinances, rules and regulations bearing on the conduct of the work required by the Contract Documents. If the Contractor observes that the Contract Documents, or any part thereof, are inconsistent or at variance therewith, Contractor shall promptly notify the Owner in writing, and any necessary changes shall be made as provided in the contract for changes in work. If the Contractor performs any work contrary to such laws, ordinances, rules and regulations or prior to obtaining permits, permission under franchises, licenses and/or bonds as required to be furnished by or obtained by the Owner, Contractor does so at Contractor's own risk and without payment or reimbursement from Owner unless Owner shall have given written approval thereof to the Contractor.
- 25.3. The Contractor shall continuously maintain adequate protection of the work from damage and shall protect the Owner's property from injury or loss arising in connection with or during the existence of this contract. Contractor shall make good any such damage, injury or loss, except such as may be directed due to errors in the Contract Documents or caused by agents or employees of the Owner. Contractor shall adequately protect adjacent property from loss or damage occasioned by performance of the work. Contractor shall provide and maintain all

passageways, guard fences, lights and other facilities for protection required by public authority or local conditions.

26. WARRANTY

26.1. Upon acceptance of the contract work, the Contractor must provide the Owner a two (2) year(s) warranty bond in a form and amount acceptable to the Owner. The contractor shall correct all defects in workmanship and materials within two (2) year(s) from the date of the Owner's acceptance of the contract work. In the event any parts are repaired or replaced, only original replacement parts shall be used—rebuilt or used parts will not be acceptable. When defects are corrected, the warranty for that portion of the work shall extend for two (2) year(s) from the date such correction is completed and accepted by the Owner. Depending on the nature of the defect, the contractor shall begin to correct any defects within seven (7) calendar days of its receipt of notice from the Owner of the defect, or a timeframe acceptable to the owner. If repair of defect(s) requires complete pool closure, the Contractor shall pay the Owner the amount of \$1000 per calendar day that the work remains uncompleted after expiration of the specified time for completion. If the contractor does not accomplish the corrections within a reasonable time as determined by the Owner, the Owner may complete the corrections and the contractor shall pay all costs incurred by the Owner in order to accomplish the correction.

27. LIMITATION OF ACTIONS

27.1. Contractor must, in any event, file any lawsuit arising from or connected with this agreement within one hundred twenty (120) calendar days from the date the contract work is complete or contractor's ability to file that claim or suit shall be forever barred. This section further limits any applicable statutory limitations period.

28. MISCELLANEOUS PROVISIONS

28.1. Independent Contractor. The parties intend that the Contract Document will create an independent contractor relationship.

28.2. Nondiscrimination. In the hiring of employees for the performance of work under the Contract Documents the Contractor, its subcontractors, or any person acting on behalf of Contractor shall not, by reason of race, religion, color, sex, age, sexual orientation, national origin, or the presence of any sensory, mental, or physical disability, discriminate against any person who is qualified and available to perform the work to which the employment relates.

28.3. Compliance with Laws. Contractor shall comply with all federal, state and local laws, rules and regulations that are now effective or in the future become applicable to Contractor's business, equipment, and personnel engaged in operations covered by the Contract Documents or accruing out of the performance of those operations.

28.4. Work performed at Contractor's Risk. Contractor shall take all precautions necessary and shall be responsible for the safety of its employees, agents, and subcontractors in the performance of the contract work. All work shall be done at Contractor's own risk, and Contractor shall be responsible for any loss of or damage to materials, tools, or other articles used or held for use in connection with the work.

- 28.5. Non-waiver of Breach. The failure of the Owner to insist upon strict performance of any of the terms and rights contained herein, or to exercise any option herein conferred in one or more instances, shall not be construed to be a waiver or relinquishment of those terms and rights and they shall remain in full force and effect.
- 28.6. Governing Law. The Contract Documents shall be governed and construed in accordance with the laws of the State of Washington. If any dispute arises between the Owner and Contractor under any of the provisions of the Contract Documents, resolution of that dispute shall be available only through the jurisdiction, venue, and rules of the Superior Court of the County in which the project is located.
- 28.7. Written Notice. All communications regarding the contract shall be sent to the parties at the addresses listed on the signature page of the contract, unless otherwise notified. Any written notice shall become effective upon delivery, but in any event three (3) calendar days after the date of mailing by registered or certified mail, and shall be deemed sufficiently given if sent to the addressee at the address stated in the contract.
- 28.8. Assignment. Any assignment of this contract by the Contractor without the written consent of the Owner shall be void.
- 28.9. Modification. No waiver, alteration, or modification of any of the provisions of the Contract Documents shall be binding unless in writing and signed by a duly authorized representative of the Owner and Contractor.
- 28.10. Severability. If any one or more sections, sub-sections, or sentences of the contract are held to be unconstitutional or invalid, that decision shall not affect the validity of the remaining portion of the contract and the remainder shall remain in full force and effect.
- 28.11. Entire Agreement. The written provisions and terms of the Contract Documents, which include these General Conditions as well as the mechanical, electrical, and structural consultants' specifications, provisions, and plans, together with any attached exhibits, supersede all prior verbal statements by any representative of the Owner, and those statements shall not be construed as forming a part of or altering in any manner the Contract Documents. The Contract Documents and any attached Exhibits contain the entire agreement between the parties. Should any language in any Exhibit to the Contract Documents conflict with any language contained in the Contract Documents, the terms of the Contract Documents shall prevail.
